

Executive Team

Thomas Wade Founder, CEO DatumNexus™

Thomas Wade had the original vision for DatumNexus nearly ten years ago. As an attorney, he saw the need for verified, validated and accurate data in every legal transaction or venture. Over the years, he tried and perfected several different techniques for verifying and validating data. His thirst for technology continued to steer him toward more automation in all of his endeavors. Thomas eventually ventured out on his own, broadening his experience of providing highly accurate information (data) to clients, most notably within the cell tower industry. After several years of perfecting this technique, Mr. Wade “packaged” his experience and knowledge into a comprehensive data verification, validation and migration strategy for Mergers and Acquisitions. With the advancement of technology and the ability to automate the process, Thomas established DatumNexus.

Thomas is a leader in Diversity Mentoring and serves on the board of several organizations. He is an advocate for social impact investing and interested in inclusive business innovation. Thomas is a graduate of Howard University School of Law.

James Young Chief Operating Officer

James Young is Chief Operating Officer/Strategic Advisor of DatumNexus and a veteran of the wireless infrastructure industry. Since joining the industry in 1998, he has held a variety of roles across numerous organizations globally. His 25+ year high-tech and leadership experience spans the private, public and government sectors - and is an aggregate of Information Technology, Wireless Infrastructure Leasing, M&A and Corporate Compliance.

Prior to joining the DatumNexus Executive Team, he lived and worked abroad as a Senior Level Advisor to several wireless infrastructure companies across Southeast Asia - until repatriating in 2017. James is a U.S. Marine Corps combat veteran and holds a Bachelor of Science in Computer Information Systems.

Alex Williams Chief Technical Officer

Alex Williams got his start in graphic design, before eventually transitioning to software engineering. From there he worked with machine learning, and later became a part of the DatumNexus team as their Chief Technology Officer. His diverse background of studies makes him a utility tool for DatumNexus’ needs, with his ability to approach problems from unique angles.

Before he studied computer technologies, Alex worked in education; teaching math, English, and computer literacy to returning education students. In his free time Alex likes to practice photography and “traditional” art, painting with his art tablet.
